# STUDY CASE

**we**design

The customer supplied us with all designs for the signage, stickers, car decals, wall decals, banners, and posters they wanted us to fabricate and install, so our job was simply providing the final layout and previews to show the customer exactly what they were getting in the final product.

# STUDY CASE

## wefabricate

No part of this project was outsourced and we made all signs, stickers, decals, and posters in-house in Singapore. Several of the larger channel letters signs were CNC cut and welded by us and pre-assembled before being taken on site to be put up against the building.

# STUDY CASE

## weinstall

The installation was done by our installation team who over a span of 2 days installed the main building signs, vehicle, glass and wall decals as well as all posters and banners ordered.

Another Maneki Signage project finished on time and within budget!
