

# STUDY CASE

## About Our Customer /

### TWINKLE

Established since 2009, Twinkle Dental is a team of experienced and caring professionals dedicated to serving you and the community of Tampines heartlands and eastern Singapore. Their clinics are fully computerised and utilise modern equipment to provide quality and affordable dental services for the whole family.

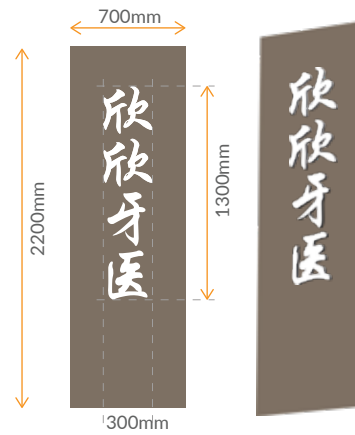

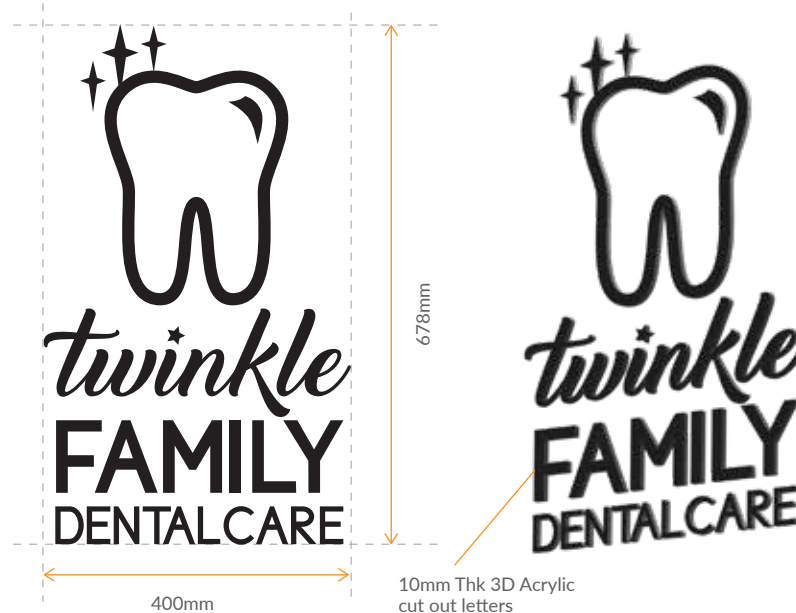

Project Date / APR 2018

# STUDY CASE

**wedesign**

The customer already had the overall design they wanted to proceed with, but asked our expertise on deciding the color scheme for the different signs - which our designers aced! Twinkle's signs look as clean and fresh as their dentistry and are easily recognizable!

# STUDY CASE

## wefabricate

Thin fonts present a particular challenge when they need to have LED lighting, but our crafters know exactly how to position the LED modules to ensure an even tone throughout each letter, while cutting down on costs because we never use more LED modules than absolutely necessary!

# STUDY CASE

## weinstall

Even for a signage company that is used to producing top quality signage, we have to say standing back at the end of an installation that only took a few hours, we were as impressed as our customer.

The colors, lighting, intensity, and contrast compared to the surrounding shops really make Twinkle's dentistry stand out!

We trust they will get us much business from their signage as we got joy making such beautiful signage!
